Nancy / Mark,

Attached is a screenshot of the original message I received from [Ex. 6 - Personal Privacy] about 2 weeks ago. Note from the message from [Ex. 6 - Personal Privacy] that there was some frustration with the EPA and CDC. I want both of you to know that I was completely supportive of the EPA yesterday and told them how Water Defense is working to support and with the EPA. Also, I told them that the EPA is dealing with a lot and sometimes the community needs to work together as a team to support the EPA and that was our intention with the UA 370 and Melissa Mays.

Please note she reached out prior to any Presidential visit and we already had this scheduled in our testing plans.

We tested the water heater and shower water yesterday. The test results will be available on Tuesday and I will e-mail them to both of you after I send to [Ex. 6 - Personal Privacy] mom.

[Ex. 6 - Personal Privacy] mom told me she still had not received her test results from the EPA. I told here Water Defense would pass this on and we would be happy to compare our test results alongside of the EPA test results.

Here is a link to summary pictures of the testing yesterday: [Ex. 6 - Personal Privacy]

The UA 370 (Harold and Ben) were present as always for the testing along with Melissa Mays.

Thanks.

Best Regards,

Scott Smith
